Fully Loaded.

The XFX GeForce® 9800 GT powers extreme HD gaming and entertainment, setting a standard far beyond expectations both in price and performance. Watch as we reveal things you've never experienced, pushing your gaming to limits you never knew existed.

- Unified Architecture
- Lumenex Engine
- 128-bit High Dynamic-Range Rendering
- Quantum Engine: Embedded Physics features
- DirectX 10 support
- SLI Support
- HDCP Capable
- Hybrid Power
- NVIDIA PhysX-Ready™
- NVIDIA CUDA Technology

GeForce™ 9800 GT

512MB [256bit] GRAPHICS CARD

Dual Dual-Link Technology

Supporting digital output up to 2560x1600 on two LCD Monitors at the same time.

SLI Ready

Delivers up to 2x the performance of a single GPU configuration for unparalleled gaming experiences by allowing two graphics cards to run in parallel. The must-have feature for performance PCI-Express graphics, SLI dramatically scales performance on over 60 top PC games.

Dual DVI

Able to drive the industry's largest and highest resolution flat-panel displays.

DVI to Analog Adapter

Includes DVI to Analog Adapter to convert your old VGA output to DVI connector.

PhysX

NVIDIA's new GPU PhysX™ technology that renders convincing facial expressions, multiple ultra-high polygon characters in complex environments and convincing physical effects like weather and explosions. NVIDIA PhysX drivers are required to experience in-game GPU PhysX acceleration.

CUDA

NVIDIA CUDA™ technology and the new CUDA enables programmers to offload the most intensive processing tasks from their CPU to their GPU, putting the power of up to 240 multi-threaded processor cores to work for you.

HybridPower

HybridPower™ technology lets you switch from the HybridPower compatible graphics card to a compatible, onboard motherboard GeForce GPU when running non-graphically intensive applications for a silent, low power PC experience.

Double Lifetime Protection

Our exclusive Double Lifetime Protection guarantees the quality and dependability of our card for both you and the second owner.
